(formerly Business Council for Sustainable Energy)
full accreditation, Design and Installation of Remote Area Power
Supply Systems. Since 2004 this has included the Design and
Supervision of Grid-connected Photovoltaic Systems 1999 - present

Professional experience

Boutique Power

Principal 2009 - present
Established Boutique Power in April 2009 as a small business specialising in stand alone renewable energy systems, diesel/battery hybrid systems, micro-hydro power, solar powered water pumping and the export of Australian renewable energy expertise into developing markets.

Export Development Manager 2009 - present
Responsible for developing export markets, with emphasis on the South Asia, South-East Asia and Oceania markets.

Technical Director 2009 - present
Responsible for site and load assessment, specification, design, project management, installation supervision and ongoing customer support

Planetary Power

Joint Proprietor 1989 – 1998

Business Manager 1998 - 2007
Jointly responsible for establishing and operating a small business, specialising in remote area power supplies with emphasis on renewable energy. Responsible for administration, financial control and stock control.

Export Development Manager 2004 - 2009
Responsible for developing export markets, with emphasis on the South Asia, South-East Asia and Oceania markets. Member of the Queensland Government Trade Mission to India, March 2004. In 2008 was responsible for establishing a joint venture partnership with AccessGlobal Pakistan (Pvt) Ltd.

Technical Director 1989 - 2009
Responsible for the site and load assessment, specification, design, project management, installation supervision and ongoing customer support of over 300 remote area power supply installations. Some of these installations are located in the remotest parts of Queensland. Also involved in the installation of many of these systems. Nearly all the installations involved solar power, wind power, micro-hydro power or a combination of these.

Experience relates mostly to power supply for single dwellings, however systems for multiple dwellings, aboriginal communities and outstations, telecommunications sites, water pumping and community facilities are included.

Particular interest in the assessment and design of low head micro-hydro projects

NSW Public Service

Computer Systems Officer 1971 - 1977
Worked on a variety of computer programming and related assignments with the Treasury ADP Service Bureau, Public Service Board ADP Implementation Service Group and the Department of Corrective Services.
